## Introduction

Welcome to the Department of Plant Science at Penn State! This student hand book is designed to give you an overview of the Plant Sciences major and to provide you with information related to graduation requirements, career opportunities and course curriculum.

Our goal is to prepare students to succeed in a broad range of careers related to the production, use, improvement, management, and protection of plants and plant-based products. We will meet this objective by providing students with a large selection of rigorous current and relevant courses in the College of Agricultural Sciences in traditional plant science disciplines including Agronomy, Horticulture, Entomology, Plant Pathology, and Soil Science along with supporting courses offered by other colleges at Penn State.

## Major Overview

The Plant Sciences major is an applied biological science baccalaureate degree program designed for students seeking careers in agronomic and horticultural crop production systems and enterprise management, agroecology, sustainable and organic managed and natural ecosystems, crop protection, applied plant physiology, plant science research, and plant biotechnology.

Students in the Plant Sciences major will gain a working knowledge of basic plant biology, soils, pests, and pathogens with emphasis on growth, development, and physiology in an ecological and agricultural context. Students will also learn the scientific, technical, and computational approaches to problem solving in an ecological and agricultural context, individually and in teams, and will have the ability to analyze ethical issues regarding ecosystem sustainability, business practices and plant science, and critically evaluate and respect different viewpoints in making management decisions. Students will also attain a high level of proficiency in written and oral communication, particularly with regard to critical evaluation of scientific issues.

There are five options in the major including an option in Agroecology, Crop Production, Horticulture, Plant Science and Plant Genetics and Biotechnology. This provides students with the flexibility for concentrations in areas including production and management systems related to agronomic and horticultural crops, plant biotechnology and breeding, crop physiology, ecology, agroecology, and other aspects of general plant science. Students can choose from diverse course offerings in designing a program of study suited to their needs and professional goals.

For more information about the program, please contact:

Dr. Dennis Decoteau  
Program Coordinator, Plant Sciences  
Department of Plant Science  
010 Tyson Building  
University Park, PA 16802

(814) 865-5587

## Advising Information

Advising at Penn State should be viewed as a shared responsibility between the adviser and the advisee. Active participation in both parties is the key to successful advising.

When you enter the Plant Sciences major you will be assigned a faculty adviser who will work in tandem with the department's advising coordinator. Your advisers will help you understand your academic strengths and help you achieve your educational goals. Your advisers will also provide guidance with academic planning, career and internship opportunities, and recommend appropriate course selections.

Students are responsible for developing and implementing their academic plan in conjunction with a Plant Science adviser. Your adviser can be an invaluable resource and mentor. Students are encouraged to meet with their adviser on a regular basis (at least once a semester). Email is the most effective method for arranging an appointment or for getting a question answered by your adviser. Contact them well in advance of registration and other academic deadlines.

Students should take an active role in planning their course work in order to meet all requirements and to graduate in a timely manner. Keep track of your progress by reviewing your "Academic Requirements" on LionPath ([lionpath.psu.edu](http://lionpath.psu.edu)) and updating your Plant Science checksheet (pages 14-18 depending on your option) each semester.

**PLEASE NOTE:** Starting summer 2018, all new students will follow the new General Education "Integrative Studies" Requirements. Students must complete 6 credits of Inter-Domain courses or 6 credits of Linked courses. BOTH courses in a Linked course combination must be completed to satisfy the requirement. "Z" is the suffix at the end of a course number used to designate a Linked course. "N" is the suffix at the end of a course number used to designate an Inter-Domain course. Linked and Inter-Domain courses can also satisfy GA, GH, GS, GN requirements.

Your advisers are committed to making your experience at Penn State enjoyable and fulfilling. Please let us know how we can help you achieve your educational and personal goals. We look forward to working with you in the Plant Sciences!

For more information about advising, please contact:

Tarrah Geszvain  
Advising Coordinator, Department of Plant Science  
117 Tyson Building  
University Park, PA 16802  
[thg110@psu.edu](mailto:thg110@psu.edu)  
(814) 863-6087

## **Program Options**

### **AGROECOLOGY:**

This option applies an ecological approach to understanding and managing cropping systems to meet societies' needs while enhancing environmental protection and resource conservation. Students will develop skills to manage agroecosystems for sustainable productivity, profitability and environmental protection by studying plant and soil sciences, ecology, and pest management from a systems perspective. The curriculum prepares students for a wide range of careers in agricultural and ecological fields, sustainable food production, and for graduate studies.

### **CROP PRODUCTION:**

This option provides students with practical and field-related skills in Agronomy (field crop production and soil management). Students will focus on techniques and knowledge necessary to efficiently and economically manage soils, crops and other farm resources with additional emphasis on pest management and commodity marketing. Courses stress the skills and information needed to work with current production technologies such as seed traits, crop protection chemicals, and fertilizers to improve yield and productivity.

### **HORTICULTURE:**

This option prepares students to enter the horticultural industry by providing a broad background in courses related to production and physiology of horticultural crops. Additional courses in pest management and business are required. Graduates may work as orchard, greenhouse, garden center, nursery or farm managers, with horticultural and landscape service providers, suppliers, and brokers, with cooperative extension and other government and non-governmental agencies and public and private gardens, or continue with graduate studies.

### **PLANT SCIENCE:**

This option emphasizes the application of the biological sciences to problem-solving in agronomic and horticultural ecosystems. Topic areas include plant biology, plant pathology, plant microbiology, plant biotechnology, plant-insect interactions, horticulture, crop science, plant ecology, and bioenergy. Graduates may find employment in industry, government and academic research programs as technicians and research assistants, or pursue graduate degrees.

### **PLANT GENETICS & BIOTECHNOLOGY:**

This option is a combination of basic science and technology-based classes designed for students who are seeking careers in agricultural sciences, plant breeding, plant molecular genetics and plant biotechnology based industries. It provides students with maximum flexibility in selecting a program of study suited to their needs and to achieve professional goals related to advanced degrees or immediate job placement in the industry. The option provides theoretical and practical skills of plant genetic manipulation relevant to plant biotechnology, plant breeding and genome research and prepares students for employment in industry or academia or pursue graduate degrees.

## Recommended Academic Plan for Agroecology Option- University Park Campus

Semester 1	Credits	Semester 2	Credits
<i>BIOL 110 – Basic Concepts and Biodiversity ( GN)</i>	4	<i>CHEM 110 – Chemical Principles I (GN)</i>	3
AG 150S – First year seminar	2	<i>CHEM 111 – Experimental Chemistry I (GN)</i>	1
<i>ENGL 015 – Rhetoric and Composition (GWS)</i>	3	AGECO 295 – Agroecology Internship	1
<i>MATH 022 – College Algebra II and Analytic Geometry OR MATH 026, 040, 041, 110, 140 (GQ)</i>	3-5	<b><i>SOILS 101 – Introductory Soil Science (GN)</i></b>	3
<b><i>AGRO 028 – Principles of Crop Management OR HORT 101 – Horticultural Sciences(GN)</i></b>	3	SOILS 102 – Introductory Soil Science Laboratory	1
		<b>AGECO 201 – Introduction to Agroecology</b>	3
		<i>CAS 100 – Effective Speech (GWS)</i>	3
Total Credits:	15-17	Total Credits:	15
Semester 3	Credits	Semester 4	Credits
Agroecology Selection (Note A)	3	ENT 313 – Introduction to Entomology	2
<i>ENG 202C – Effective Writing: Technical Writing (GWS) OR ENG 202D – Effective Writing: Business Writing (GWS)</i>	3	ENT 314 – Management of Insect Pests of Ornamentals or ENT 316 – Field Crops Entomology	1
<i>AG BM 101 – Economic Principles of Agribusiness Decision Making (GS), ECON 014 – Principles of Economics (GS), ECON 102 – Microeconomics Analysis and Policy (GS), OR ECON 104 – Introductory Macroeconomic Analysis and Policy (GS)</i>	3	PLANT 200 – Introduction to Agricultural Crop Growth, Form, and Function	3

Social and Behavioral Sciences (GS) **	3	ELECTIVES as needed to make 120 credits	4
General Health and Wellness (GHW)	1.5		
Total Credits:	14.5	Total Credits:	16

### NOTES:

- A (Agroecology Selection):** Select 3 credits from AGECO/METEO 122 (3)-Atmospheric Environment – Growing in the Wind, AGECO 134 (3)-Sustainable Agriculture Science and Policy, AGECO 144 (3)-Principles and Practices of Organic Agriculture, or AGECO 154 (2)-Principles of Agronomic Field Operations, or AGECO 496 (1)-Independent Studies in Agroecology
- B (Ethics Selection):** Select 3 credits from AG 160 GH (3)-Introduction to Ethics and Issues in Agriculture, PHIL 013 GH (3)-Philosophy, Nature, and the Environment, PHIL 103 GH (3)-Introduction to Ethics, or GEOG 030 GS:IL (3)-Geographic Perspectives on Sustainability and Human-Environment Systems
- C (Production Selection):** Select 6 credits from AGRO 423 (3)-Forage Crop Management, AGRO 425 (3)-Field Crop Management , HORT 202 (3)-Plant Propagation, HORT 315 (3)-Environmental Effects on Horticultural Crops, HORT 431 (3)-Small Fruit Culture, HORT 432 (3)-Deciduous Tree Fruits, HORT 433 (3)-Vegetable Crops, HORT 450 (3)-Greenhouse Management, or SOILS 418/AGECO418/AN SC 418 (3)-Nutrient Management in Ag.Systems
- D (Plant Breeding/Genetics Selection):** Select 3 credits from BIOL 222 (3)-Genetics or HORT 407 (3)-Plant Breeding
- E (Writing Across the Curriculum Selection):** Select 3-4 credits from AGRO 410W (4)-Physiology of Agricultural Crops, HORT 412W (3)-Post Harvest Physiology, or SOILS 412W (3)-Soil Ecology

\*These are courses from the “Approved List of Supporting Courses” for the Agroecology Option.

\*\*Students must take 6 credits of either Linked or Inter-Domain courses. These requirements should be fulfilled by selecting GH, GS and GA courses with the appropriate Linked or Inter-Domain designation. Students also need to complete one course with a US and one course with an IL designation.

**Bold type** indicates courses requiring a quality grade of C or better. *Italics* indicate courses that satisfy both major and General Education requirements.

**Bold Italics** indicates courses requiring a quality grade of C or better and that satisfy both major and General Education requirements.

HORT 402W – Plant Nutrition	3	ELECTIVES OR SUPPORTING COURSES	4-9
Total Credits:	15-16	Total Credits:	12.5-17.5

### NOTES:

- A (Business/Spanish Selection):** Select 9-10 credits from AG BM 200 (3)-Introduction to Agricultural Business Management AG BM 407 (3)-Farm Planning and Financial Management, B LAW 243 (3)-Legal Environment of Business, B A 301 (3)- Finance, B A 303 (3)- Marketing, SPAN 001 (4)-Elementary Spanish I, SPAN 002 (4)-Elementary Spanish II, SPAN 003 (4)-Elementary Spanish III, or SPAN 105 (4)-Spanish for Students in the Field of Agricultural Sciences
- B (Horticulture Production Selection):** Select 6-7 credits from HORT 408 (4)-Landscape Plant Establishment and Maintenance, HORT 431 (3)-Small Fruit Culture, HORT 432 (3)-Deciduous Tree Fruits, HORT 433 (3)-Vegetable Crops, HORT 450 (3)-Greenhouse Management, or HORT 453 (3)-Flower Crop Production and Management
- C (Plant Materials or Production Selection):** select 3 credits from HORT 131 (3)-Herbaceous Perennial and Annual Identification, HORT 137 (3)-Ornamental Plant Materials, HORT 138 (3)-Ornamental Plant Materials, HORT 431 (3)-Small Fruit Culture, HORT 432(3)-Deciduous Tree Fruits, or HORT 433(3)-Vegetable Crops

\*\*Students must take 6 credits of either Linked or Inter-Domain courses. These requirements should be fulfilled by selecting GH, GS and GA courses with the appropriate Linked or Inter-Domain designation. Students also need to complete one course with a US and one course with an IL designation.

**Bold type** indicates courses requiring a quality grade of C or better.

*Italics* indicate courses that satisfy both major and General Education requirements.

**Bold Italics** indicates courses requiring a quality grade of C or better and that satisfy both major and General Education requirements.

- E (General Plant Science Selection):** Select 3-4 credits from BIOL 407 (3)-Plant Developmental Anatomy, BIOL 424 (3)-Seeds of Change: The Uses of Plants, BIOL 441 (3)-Plant Physiology, HORT 402W (3)-Plant Nutrition, HORT 412W (3)-Post-Harvest Physiology, HORT 420-Plant Growth Regulators, PPEM 417 (3)-Phylobacteriology or PPEM/ERM 430-Air Pollution Impacts to Terrestrial Ecosystems, MCBIS 591 (1) – Ethics in the Life Sciences
- F (Production Selection):** Select 3 credits from AGRO 423 (3)-Forage Crop Management, AGRO 425 (3)-Field Crop Management, HORT 202 (3)-Plant Propagation, HORT 315 (3)-Environmental Effects on Horticultural Crops, HORT 431 (3)-Small Fruit Culture, HORT 432 (3)-Deciduous Tree Fruits, HORT 433 (3)-Vegetable Crops, HORT 450 (3)-Greenhouse Management, or SOILS 418/AGECO418/AN SC 418 (3)-Nutrient Management in Agricultural Systems

\*\*Students must 6 credits of either Linked or Inter-Domain courses. These requirements should be fulfilled by selecting GH, GS and GA courses with the appropriate Linked or Inter-Domain designation. Students also need to complete one course with a US and one course with an IL designation.

**Bold type** indicates courses requiring a quality grade of C or better.

*Italics* indicate courses that satisfy both major and General Education requirements

**Bold Italics** indicates courses requiring a quality grade of C or better and that satisfy both major and General Education requirements

## Recommended Academic Plan for Plant Genetics and Biotechnology Option – Commonwealth Campuses

Semester 1	Credits	Semester 2	Credits
<i>BIOL 110 – Basic Concepts and Biodiversity (GN)</i>	4	<i>CHEM 110 – Chemical Principles I (GN)</i>	3
First year seminar (S) (if required)	1-3	<i>CHEM 111 – Experimental Chemistry I (GN)</i>	1
GEN ED (GS)**	3	Arts (GA)**	3
<i>ENGL 015 – Rhetoric and Composition (GWS)</i>	3	Humanities (GH)**	3
<i>MATH 022 – College Algebra II and Analytic Geometry OR MATH 026, 040, 041, 110, 111, 140, or 140B (GQ)</i>	3-5	<i>CAS 100 – Effective Speech (GWS)</i>	3
Total Credits:	14-18	Total Credits:	13
Semester 3	Credits	Semester 4	Credits
<i>CHEM 112 – Chemical Principles II (GN)</i>	3	<i>ENG 202C – Effective Writing: Technical Writing (GWS) OR ENG 202D – Effective Writing: Business Writing (GWS)</i>	3
Humanities (GH)**	3	Microbiology Molecular Biology & Biochemistry Selection (Note A)	4-6
<i>AG BM 101 – Economic Principles of Agribusiness Decision Making (GS), ECON 014 – Principles of Economics (GS), ECON 102 – Microeconomics Analysis and Policy (GS), OR ECON 104 – Introductory Macroeconomic Analysis and Policy (GS)</i>	3	<i>STAT 200 – Elementary Statistics (GQ) OR STAT 240 – Introduction to Biostatistics (GQ) OR STAT 250 – Introduction to Biostatistics (GQ)</i>	3-4
<i>PHYS 250 Introductory Physics (GN)</i>	4	Health and Physical Activity (GHW)	1.5
Health and Physical Activity (GHW)	1.5	Arts (GA)**	3
Total Credits:	15.5	Total Credits:	14.5-17.5
Semester 5	Credits	Semester 6	Credits
BIOL 222 – Genetics	3	AGRO 410W - Physiology of Agricultural Crops	4
CHEM 210 – Fundamentals of Organic Chemistry I	3	AGRO/BIOTC 460 – Advance and Applications of Plant Biotechnology	3
AGRO 028 – Principles of Crop Management OR HORT 101 – Horticultural Sciences (GN)	3	CHEM 212 – Fundamentals of Organic Chemistry II	3
<b>PPEM 405 – Plant Microbe Interactions</b>	3	PLANT 200 – Introduction to Agricultural Crop Growth, Form, and Function	3
<b>SOILS 101 – Introductory Soil Science (GN)</b>	3	ENT 313 – Introduction to Entomology	2
Production Selection (Note F)	3	ENT 314 – Management of Insect Pests of Ornamentals or ENT 316 – Field Crops Entomology	1
Total Credits:	18	Total Credits:	16
Semester 7	Credits	Semester 8	Credits
<b>AGECO/ENT 457 Principles of Integrated Pest Management</b>	3	General Plant Science Selection (Note E)	3-4
BMB 400 – Molecular Biology of the Gene	2	Plant Microbiology & Entomology Selection (Note D)	3
Plant Ecology, Evolution & Systematics Selection (Note B)	3-4	HORT/BIOTC 459 – Plant Tissue Culture and Biotechnology	3
AGECO 495, AGRO495, HORT 495, HORT 496 Internship or Independent Study	1	ELECTIVES (as needed for 120 credits for degree)	3-4
HORT 407 – Plant Breeding	3	<b>PLANT 461 – Emerging Issues in Plant Sciences</b>	3
Plant Genetics & Biotechnology Selection (Note C)	2-3	Total Credits:	15-17
Total Credits:	14-16		

### Notes:

- A (Microbiology, Molecular Biology & Biochemistry Selection):** Select 4-6 credits from: BIOL 230W GN (4)-Biology: Molecules and Cells, or BIOL 240W GN (4)-Biology: Function and Development of Organism, or BMB 211 (3)-Elementary Biochemistry and BMB 212 (1)-Elementary Biochemistry Laboratory, or MICRB 201 (3)-Introductory Microbiology and MICRB 202 (2) -Introductory Microbiology Laboratory, or MICRB 251(B M B 251) (3)-Molecular and Cell Biology I and MICRB 252 (3)-Molecular and Cell Biology II
- B (Plant Ecology, Evolution & Systematics Selection):** Select 3-4 credits from BIOL 412 (3)-Ecology of Infectious Diseases, BIOL 414 (3)-Taxonomy of seed Plants, BIOL 427 (3)-Evolution, BIOL 428 (3)-Population Genetics, BIOL 436 (3)-Population Ecology and Global Climate Change, BIOL 448 (3)-Ecology of Plant Reproduction, ENT 420 (3)-Introduction to Population Dynamics, HORT 445 (3)-Plant Ecology, or PPEM 425 (4) -Biology of Fungi
- C (Plant Genetics & Biotechnology Selection)** Select 2-3 credits from BIOL 439 (3)-Population Ecology and Global Climate Change, MCBIS 571 (2) –Current Issues in Biotechnology, BIOTC 479 (3) – Methods in Biofermentation, HORT 497B (3) – Current Topics in Plant Breeding, MCBIS 593 (3)-Molecular Biology Lab
- D (Plant Microbiology & Entomology Selection):** Select 3-4 credits from ENT/VBSC 402W (3)-Biology of Animal Parasites, ENT 410 (3)-Insect Structure and Function, PPEM 416 (3)-Plant Virology: Molecules to Populations, or PPEM 425 (4)-Biology of Fungi
- E (General Plant Science Selection):** Select 3-4 credits from BIOL 407 (3)-Plant Developmental Anatomy, BIOL 424 (3)-Seeds of Change: The Uses of Plants, BIOL 441 (3)-Plant Physiology, HORT 402W (3)-Plant Nutrition, HORT 412W (3)-Post-Harvest Physiology, HORT 420-Plant Growth Regulators, PPEM 417 (3)-Phylobacteriology or PPEM/ERM 430-Air Pollution Impacts to Terrestrial Ecosystems, MCBIS 591 (1) – Ethics in the Life Sciences
- F (Production Selection):** Select 3 credits from AGRO 423 (3)-Forage Crop Management, AGRO 425 (3)-Field Crop Management, HORT 202 (3)-Plant Propagation, HORT 315 (3)-Environmental Effects on Horticultural Crops, HORT 431 (3)-Small Fruit Culture, HORT 432 (3)-Deciduous Tree Fruits, HORT 433 (3)-Vegetable Crops, HORT 450 (3)-Greenhouse Management, or SOILS 418/AGECO418/AN SC 418 (3)-Nutrient Management in Agricultural Systems

\*\*Students must 6 credits of either Linked or Inter-Domain courses. These requirements should be fulfilled by selecting GH, GS and GA courses with the appropriate Linked or Inter-Domain designation. Students also need to complete one course with a US and one course with an IL designation.

**GENERAL EDUCATION**

<i>Course</i>	<i>Cr.</i>	<i>Grade</i>	<i>Sem.</i>
<b>Skills</b>			
<u>Communications</u> (GWS 9 credits) [satisfied by 9 credits from ENGL 015 or 30, ENGL 202C/D and CAS 100 in prescribed courses]			
<u>Quantification</u> (GQ 6 credits) [satisfied by 6 credits from MATH 022 (or higher) or higher, and STAT 200/240/250]			
<b>Knowledge Domains</b>			
<u>Natural Sciences</u> (GN 9 credits) [satisfied by 9 credits from BIOL 110, CHEM 110, CHEM 111, HORT 101/AGRO 028]			
<u>Arts</u> (GA 6 credits)			
	(3)		
	(3)		
<u>Humanities</u> (GH 6 credits)			
	(3)		
	(3)		
<u>Social &amp; Behavioral Sciences</u> (GS 6 cr)			
[3 credits satisfied from ECON 102/AG BM 101]			
	(3)		
<u>General Health and Wellness</u> (GHW 3 cr)			
<b>US Cultures and International Cultures Requirement</b> (3 credits US and 3 credits IL) [can be satisfied by GA/US, GA/IL, GH/US or GH/IL]			
	(IL)		
	(US)
